

注意事项：

1.

本试卷分第 I 卷（选择题）和第 II 卷（非选择题）两部分。答卷前，考生务必将自己的姓名、准考证号填写在答题卡上。

2.

回答第 I 卷时，选出每小题答案后，用2B铅笔把答题卡上对应题目的答案标号涂黑。如需改动，用橡皮擦干净后，再选涂其他答案标号。写在本试卷上无效。

3. 考试结束后，将本试卷和答题卡一并交回。

第 I 卷（选择题，共55分）

一、选择填空（共10小题，每小题1分，满分10分）

从题中所给的A、B、C、D四个选项中，选出一个最佳答案。

1. —The song What the World Has Given Me at the Spring Festival Gala amazed everyone.

—I agree. Faye Wong's ethereal (空灵的) voice was a perfect _____ for the song.

A · honor B · sense C · fit D · chance

2. —Does the old woman live alone?

—Yes. She has a husband and two children, but _____ of them live with her.

A · all B · either C · neither D · none

3. —Our school's reading festival was a huge success!

—Yes! The _____ school took part in it—students shared book reviews, teachers read aloud, and even the principal dressed as Harry Potter!

A · active B · whole C · quiet D · modern

4. Reading can _____ you out of your common daily life. It shows you new chances to experience an amazing one.

A · keep B · call C · pull D · kick

5. —Hurry up! Mom is waiting for us downstairs.

—OK, Dad! I'll get my backpack now and it won't _____ long.

A · afford B · pay C · take D · spend

6. —Where shall we go for a holiday after the graduation ceremony?

—Since we're both interested in Terracotta Army (兵马俑), Xi'an should be our _____.

A · fair chance B · fine example C · first choice D · far future

7. —How did she get such a high score in the English exam?

—She _____ lunch breaks to memorize as many words as she can.

A · took advantage of B · got used to C · took part in D · separated from

8. —I've been trying to lose weight, but it's so hard.

—Keep going! _____, it takes time and effort to see results.

A · In total B · At last C · For example D · After all

9. —Do you often _____ your childhood?

—Yes, often. Those summer vacations with my grandparents were the happiest days.

A · get on with B · look back on C · take part in D · keep away from

10. —Lily, Why is the saying "You cannot please everyone" so true?

—Because it tells us _____.

A · how to make everyone happy B · that it's impossible to satisfy all people

C · why should we never care about others' opinions D · when we should stop trying to help others

二、完形填空（共15小题，每小题1分，满分15分）

阅读下面短文，从短文后各题所给的A、B、C、D四个选项中，选出可以填入空白处的最佳选项。

It was a regular school day, and the air was full of the usual sounds of chatter and laughter as students prepared for their lessons. Little did I know that this day would soon take a _____ 11 _____ turn, making it an unforgettable day.

As the bell rang, we entered the classroom, completely unaware (不知道) of the coming _____ 12 _____. The teacher began the lesson, and we were really focused on our literature lesson when, out of nowhere, a loud fire alarm _____ 13 _____.

Fear spread as we understood how _____ 14 _____ the situation was. Smoke _____ 15 _____ the hallway, and a sharp burning

smell hung in the air. The neat classroom turned into a mess as everyone 16 to the door. In all the chaos (混乱), I noticed my classmate Sarah looking obviously 17 by her desk. I quickly 18 she needed help. Without hesitation (犹豫), I rushed over, took her shaky hand, and told everyone to stay calm. We helped each other go through the thickening smoke, and each 19 felt like a really long time. As we reached the door, it felt hotter, and we knew we had to hurry. With hearts 20 , we hurried into the playground 21 teachers and students were making sure everyone stayed safe. Outside, we took a moment to 22 our breath, surrounded by the loud sounds of approaching (靠近) fire trucks. Seeing parts of the building on fire, a sense of 23 washed over us, knowing that we had made it out unharmed. After everything happened, I couldn't help thinking of that day. Going through it taught me it's important to stay calm when things get worse and how helping others during hard times 24 . It was a day when ordinary students became 25 , bound (联合) together by the shared determination to overcome the unexpected challenges.

- 11 · A · classic B · dramatic C · powerful D · thankful
 12 · A · deal B · meeting C · danger D · truth
 13 · A · turned on B · pulled through C · broke down D · went off
 14 · A · formal B · special C · serious D · shocked
 15 · A · lifted B · completed C · filled D · passed
 16 · A · flew B · delivered C · jogged D · walked
 17 · A · excited B · well C · scared D · calm
 18 · A · suggested B · reminded C · stressed D · realized
 19 · A · fight B · step C · wave D · foot
 20 · A · suffering B · begging C · racing D · hurting
 21 · A · which B · where C · that D · how
 22 · A · hold B · save C · catch D · bring
 23 · A · confidence B · sadness C · pain D · relief
 24 · A · fails B · appears C · matters D · disappoints
 25 · A · leaders B · winners C · friends D · heroes

三、阅读理解 (共15小题, 每小题2分, 满分30分)

阅读下面三篇材料, 从每题所给的A、B、C、D四个选项中, 选出最佳选项。

A

- 26 · In which SECTION of the newspaper can we read the news?
 A · WILDLIFE. B · TRAVEL. C · TECHNOLOGY. D · ENVIRONMENT.
 27 · What led to the Przewalski's horses' successful comeback in China?
 A · New laws to better protect nature in China.
 B · Careful raising programs in Xinjiang and Gansu.
 C · The introduction of more wild horses from Mongolia.
 D · The increase of global Przewalski's horse population.
 28 · What is reported about the new Ecological and Environmental Code?
 A · It will provide poor families with money.
 B · It will stop all climate changes at once.
 C · It helps solve problems between humans and wildlife.
 D · It stops companies from using recycled materials.
 29 · The best heading of the third piece of news would be _____.
 A · Clearing the Air: Drones Fight Against Dust and Pollution
 B · High-Tech Aid: Drones Send Needed Things After Disasters
 C · Drones: Powerful Tools for Environmental Protection
 D · Eyes in the Sky: Watching Over Against-the-Law Tree Cutting
 30 · What does the above news focus on?
 A · Animal protection stories. B · New technology for travel.
 C · International animal trade rules. D · Environmental protection.

B

Instead of being crazy about smartphones and games, Zhang Lizhi prefers to spend his summer vacation walking in nature, meeting with little creatures like shrimps and crabs (蟹).

The 17-year-old boy became popular online recently for his knowledge of biology, which led him to discover a new species of freshwater crabs of Sinolapotamon.

Zhang's father, who was born in the country, loved catching fish and crabs himself at an early age, so Zhang was always taken outdoors by his parents to explore as much as possible and observe (观察) little creatures quietly without being interrupted. Now a Grade 12 student at Yulin High School, Zhang has dozens of "living treasures" that he has collected from the outdoors, including insects, fish, shrimps and crabs.

"This one is a species of Nanhaitapamon that I caught in a mountainous area," said Zhang, pointing to a bright-colored crab moving its amusing eyes around: "You can see it just shed its shell." There is also a row of empty bottles and jars in Zhang's room to store his treasures. "I can notice the small differences between two shrimps, and then I take them back to my room for further observation," said Zhang.

It is the microscope (显微镜) his father bought him that makes the bedroom look more like a mini biology lab than anything else. It's a place where Zhang can lose himself in observing shrimps or crabs day and night. With the help of his microscope, Zhang focuses on exploring the natural world. Sometimes he spends hours simply examining a fish scale, the leg of a crab or the antenna of an insect. He often works so late that his parents have to force him to go to bed.

"I'm often amazed by what I see while placing these tiny things under the microscope. No matter how unimportant an insect is, each life is so uniquely organized," said Zhang.

31 · What made Zhang popular online?

- A · His meeting with shrimps and crabs. B · His videos of outdoor adventures.
C · His collection of "living treasures" . D · His discovery of a new type of crab.

32 · What inspired Zhang's interest in exploring nature?

- A · His father's early job. B · A crab he once caught.
C · His school's field trips. D · His childhood experiences.

33 · What does paragraph 5 mainly talk about?

- A · Zhang's tools for observations. B · Zhang's achievements in biology.
C · Zhang's mini biology lab at home. D · Zhang's love for his specimens.

34 · The underlined word "interrupted" in Paragraph 3 probably means _____.

- A · helped B · stopped C · encouraged D · praised

35 · What's the best title for the passage?

- A · From Smartphones to Shrimps B · Zhang Lizhi: A Young Biology Discoverer
C · A Land For Little Creatures D · The Collection of "Living Treasures"

C

Paper is one of the basic products of the modern world. From books to toilet paper, everyone uses paper in daily life.

According to a report, 40% of the 15 billion trees cut down are used to produce paper every year. More importantly, the paper-making process uses lots of water and causes air pollution.

This is where Releaf Paper comes in. The company has found an ingenious way to make environmentally friendly paper. Instead of using wood to make paper, it uses leaves. The company was set up by Valentyn Frechka. He has always been interested in biochemistry (生物化学), which led him to try making paper from grass. When that failed, he moved on to leaves and achieved success.

So how is the paper produced? Some European cities collect leaves from their streets and send them to Releaf Paper. Then, using mechanical (机械的) and chemical processes, the company is able to create one ton of cellulose (纤维素) from 2.3 tons of leaves. Cellulose is the material that paper is made of. Lignin (木质素), the leftover (残留物) from the processes, is then sent back to the cities to be used as fertilizer (化肥). The new processes use 15 times less water and cause less air pollution than the traditional paper producing model.

"We are working only with the leaves that we get from cities because we cannot use the leaves from the forest. It's not easy to collect them in the forest, and there is no need because there is an ecosystem," Frechka said. "We get leaves for making paper and return lignin to the cities. It's like a win-win model."

36 · What does the underlined word "ingenious" mean?

- A · Long. B · Expensive. C · Traditional. D · Creative.

37 · Which is the correct order to show Releaf Paper's way of making paper?

- a. create cellulose b. send back the leftover to the city c. collect leaves from streets d. make paper

- A · c-a-d-b B · a-d-c-b C · c-b-a-d D · a-c-d-b

38 · Releaf Paper doesn't use leaves in the forest probably because _____.

- A · they are too far to get
B · doing this will cost a lot of money
C · there are more leaves in the streets than in the forests
D · it' s hard to collect them and the nature can deal with leaves
- 39 · Compared with the traditional paper producing model, Releaf Paper might
A · cause less air pollution but use more water
B · help make our planet a greener place to live in
C · make paper more easily and sell them at a higher price
D · no longer use machines to produce paper
- 40 · What would be the best theme picture of the passage?
A · B · C · D ·

第II卷 (非选择题 共35分)

四、词与短语填空 (共5小题, 每小题1分, 满分5分)

仔细阅读下面五个句子, 然后用下面方框中所给的单词或短语填空, 使每个句子在结构、句义和逻辑上正确。(提示: 选项中有一个是多余的)

Many people love smelling an old book. But what makes that special smell? Lignin (木质素)! Lignin can be 41 in the trees that paper is made from. As a book gets older, lignin starts to break down slowly and 42 chemicals we can smell. But why do people like the smell? Scientists from University College London carried out a study where they 43 an "old book smell" using fibers (纤维) from a 1928 French book and seventy—nine people were asked to smell it. These participants (参与者) said the smell was 44 to that of chocolate or coffee. This shouldn' t be a 45 , because coffee and chocolate also come from materials that have lignin!

五、阅读理解填词 (共10小题, 每小题1分, 满分10分)

阅读下列短文, 根据所给首字母, 上下文或括号内单词提示, 在空白处填入适当的单词。每个空只能填一个词。

China' s first 8K movie filmed in space, named Blue Planet Outside the Window, was shown all over the country on September 5, 2025. The movie uses videos taken 46 Shenzhou-13 astronauts. And it is 47 important step in the cooperation between space and film.

According to China Media Group, the story is about the 48 (team) six-month space journey in China' s space station. The movie 49 (tell) mainly from Wang' s point of view. It shows amazing space views that people have never seen, and provides a 50 (close) look at the life on the space station than before. As China' s first space movie project, it was filmed with 8K super clear cameras, 51 these cameras were fully developed in China.

The 52 (create) team worked with space engineers and overcame many big challenges. These included rocket shake tests, space environment tests, and adapting the equipment (调整设备) so that it could be 53 (safe) charged (充电) and stored on the space station. The special filming equipment was sent to the space station by the Tianzhou cargo spaceship in 2021.

On October 16, 2021, the Shenzhou-13 task sent three Chinese astronauts to the core module (核心舱) of China' s space station 54 (complete) their scientific research and filming work. During their task, the team performed two spacewalks and also showed 55 people live and work in space. This task marked the completion of testing for all the key technologies of China' s space station.

六、书面表达 (共1大题, 满分20分)

假如你是来自903班的李欣同学, 学校广播站的English

Corner栏目正在开展以"感恩"为主题的征文。根据以下提示问题, 从感谢谁、感谢理由和感谢方式等方面写一篇英语征文。

内容提示:

Who are you thankful for?

Why do you want to thank/him/her/them?

How will you show your thanks?

Something more about it.

注意: 文中不得透露个人真实信息, 词数100词左右 (开头已给出的词不计入总词数)。

Thank you, _____ I am Li Xin from Class 3, Grade 9. _____

Przewalski's Horses' Return Once endangered in the wild, Przewalski's horses are making an amazing comeback. Originally from China and Mongolia, this special kind of animal was brought back from overseas in 1985. Through careful breeding (繁殖) programs in Xinjiang and Gansu, their population has grown year by year. By 2025, over 900 of these wild horses were living in China, making up one-third of the global total. Experts say China's work in breeding and winter feeding has been excellent, showing large animals can return to their natural habitats successfully. |

New Code for a Greener Future China is creating its first Ecological and Environmental Code to better protect nature. This new law will combine many rules into one system to deal with problems like climate (气候) change and human-wildlife problems. For example, if wild animals harm crops or put people in danger, local governments must help, and people who get hurt will receive some money. It also encourages companies to recycle old products like electric car batteries and use more recycled materials, hoping for a greener and more long-lasting development. |

Drones (无人机) are becoming powerful tools for environmental protection. In forests, they can fly over large areas to find people cutting trees without being allowed or early signs of fire much faster than humans on the ground. Some cities also use special drones to clean the air by spraying water to reduce dust and pollution. With their speed and ability to go anywhere, drones are truly becoming guardians of our planet. |
